## COMPACT SCOUT ROVER THUMBHOLE

Our COMPACT SCOUT bolt-action rifle for hunting is available in .308 and 30-06 and features a **new techno polymer stock** with **thumbhole** for improved grip and aiming for instinctive shooting. In addition to that, the **COMPACT SCOUT** features 47-cm barrels with 1 in 8" rifling to stabilize even the most powerful ammunition on the market today.

This bolt action comes standard with muzzle break; threaded cover, and Picatinny rail on the barrel to mount the sighting system of your choice. The expanded 5-round magazine makes it ideal for driven hunting and hunting in harsh environments.

The Model **ROVER THUMBHOLE** is available in all the calibers we offer and comes with the same technical specifications and ballistic performance as the popular and proven Mod. Rover. However the thumbhole stock definitely translates into faster and more precise aiming.
